

## TRCCS Green Team Message

Hello Sunset Lake community members, we think we can all agree that Sunset is a beautiful lake that is rich in fish and other wildlife. But, a violent weed called milfoil is taking over the lake and killing aquatic life. That is why we are trying to get rid of this invasive plant. The TRCCS seventh grade has been doing a conservation project with Paul List called the Green Team. We've been removing milfoil and doing awareness projects for two years and have removed about 1500 pounds of milfoil in total. We'd like to reach out to the community because you can volunteer easily with the Sunset Lake Association. At TRCCS we love Sunset Lake too and we hope you will appreciate our efforts to keep the lake clean. We want to make the lake a better place, and with your hard work, we can all help protect the lake.
